

K-Love Radio is important to me because it provides me with encouraging, positive listening on the radio. It like a fresh breeze in today's polluted radio environment. By taking it off the air I feel would be a dis-service to not only this community, but also the nation as a whole. We lack in this country positive and encouraging listening on our airwaves. Indeed we should be more concerned with providing more stations like K-Love on the air waves so that the youth of today may have somewhere they can turn to for encouragement, instead of the hate and negativity so rampant on the radio today.
